

PERFORMANCE AND PROJECTIONS

CAS–Carrera Adolescent Pregnancy Prevention Program

www.stopteenpregnancy.com

CAS–Carrera is the only national primary adolescent pregnancy prevention program whose effectiveness has been scientifically proven over a three-year period.

Evaluated by Philliber Research Associates, the Children’s Aid Society–Carrera Adolescent Pregnancy Prevention Program (CAS–Carrera) is the only national teenage pregnancy prevention program whose effectiveness has been scientifically proven. A longitudinal study conducted over three years showed a 50 percent reduction in birth rates in communities served, and a multitude of other positive outcomes, including statistically significant improvements in high school graduation and college admission rates, increased employment experience, more bank accounts, and increased use of primary care physicians instead of emergency rooms. In 2009, the Coalition for Evidence-Based Policy identified CAS–Carrera as having “top tier” evidence of effectiveness, one of the few pregnancy prevention programs in the United States to receive this distinction.

Building on the success of its after-school model, CAS–Carrera has developed an integrated school model to provide similar services throughout the school day. This model employs CAS–Carrera’s traditional seven components: daily education; weekly employment; mental health; family life and sexuality education; self-expression; lifetime individual sports; and no-cost, comprehensive medical and dental services. CAS–Carrera begins with an entire 5th or 6th grade and adds a new grade each year until high school graduation, reducing cost per participant through economies of scale. The organization is committed to conducting additional research to ensure that the integrated school model achieves outcomes comparable to those of the original after-school program.

Geographic Reach

CAS–Carrera has replicated in New York City, where it has implemented five integrated school programs and five legacy after-school programs. In addition, there are integrated school replications in Flint, Michigan; Washington, DC; and Baltimore, Maryland; and after-school programs in Toledo, Ohio; Flint/Beecher, Michigan; New Britain and Waterbury, Connecticut; and Newark, New Jersey.

CAS –Carrera Program: Youth Served

CAS – Carrera Program: Total Net Revenue — Network Wide (in millions)

2010 revenue includes only CAS-Carrera’s national office operations. Prior years (2005–2009) reflect total revenue across the network.

Performance

CAS – Carrera Program: Average Daily Attendance Rate
